SUMMARY

Product Operations professional skilled at turning user issues into actionable improvements that shorten resolution cycles, reduce user friction, and improve product development efficiency. Proven ability to partner with Product Managers on backlog refinement and quality improvements across releases.

WORK EXPERIENCE

Muck Rack, Remote

Product Operations Specialist

Jun 2025 – Present

- Coordinated delivery of our [Media List Importer](#) feature, reducing import-related support requests by 52%
- Partnered with Product Managers in backlog refinement and sprint planning to ensure customer friction and issue trends informed release priorities
- Ran QA for 2-3 releases per month, identifying bugs prior to launch and preventing customer-facing issues
- Implemented a new user issues escalation workflow reducing resolution times from multiple days or weeks to same-day or same-week resolution
- Monitored performance through Grafana, Datadog, and other dashboards to improve response time during incidents
- Used SQL to query our database and generate reports for users and internal teams

Customer Support Specialist II, Technical Support

Oct 2023 – Jun 2025

- Managed end-to-end process of user issues, from reporting to troubleshooting, reporting, prioritization, and follow-up
